

IOLCF Business Solutions

In a nutshell, **IOLCF Business Solutions** helps you stay focused on running your business.

Payroll administration, human resource management, insurance protection, tax compliance, administration of health benefits and the ever changing governmental regulation regarding employees all have common denominators - they are a necessity in running a business, and they are a cost to your business.

Today's fast-paced business climate has left little time for the non-revenue functions of your business. To stay competitive, your focus must be in the profit and loss centers of your business marketing, controlling internal costs, producing a quality product, sales and keeping the customer happy and returning to your store.

IOLCF Business Solutions is designed to help our members rid themselves of the time-consuming tasks associated with human resource management, payroll and tax processing, insurance and benefits administration, and government compliance. Since few businesses can afford to staff for expertise in each of these areas, they rely on internal employees to manage areas outside their scope of knowledge.

By outsourcing these functions to **IOLCF Business Solutions**, you're letting our team of professionals manage what we do best:

- ❖ [Human Resource Management](#)
- ❖ [Payroll Administration](#)
- ❖ [Group Benefits](#)
- ❖ [Retirement Planning](#)
- ❖ [Employee Financial Services](#)
